

The logo for First Geo, featuring the word "FIRSTGEO" in a bold, black, sans-serif font. The letters are set against a background that is a horizontal strip of a landscape image showing a blue sky and a dark horizon line.

Available subsurface consultants for
the upcoming license rounds

First Geo has a strong team of employees and a large network of associated specialists.

We support E&P companies with consultancy and studies through the value chain from exploration to tail-end within disciplines such as:

- Geophysics
- Geology
- Seismic interpretation
- Petrophysics
- Reservoir and Production engineering
- Drilling and Well engineering
- Data Management
- Data Hosting

NORWEGIAN PETROLEUM
DIRECTORATE

We have available capacity, and are able to hit the ground running with support for the upcoming license rounds. We can deliver individually outplaced consultants or self-driven teams, either at the clients office or remotely in one of our offices. As we are set up with our own data centre for subsurface data services we are flexible regarding placement of the team, and all our resources are available remotely for our consultants at the client site if needed.

For outplacement of personell we currently have the following experienced personell available for round work:

- Seismic Interpretation
- Basin Modelling
- Petrophysics Reservoir Engineering and technical/economical evaluation
- Drilling and well engineering, completion and cost estimation
- Various geoscience specialists

If your company is in need of support, please let us know, and we will swiftly return with an overview of suitable capabilities and commercial conditions.
